Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 2-5 and 14-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP 0162,302.

See the appropriate paragraph of the previous Office action.

EP 0162,302 teaches a light reflective particle that has the same diameter as the claimed polymer bead containing embedded light reflective particles. Page 8 line 27 teaches the light reflective particles have a diameter of 0.1-1.2 microns which has been read on the claimed particle diameter range. In the absence of a showing of unexpected results, one having ordinary skill in the art would have expected the taught light reflective particle to have indistinguishable properties from the claimed polymer bead containing embedded light reflective particles because both are within the same size range and have the same light reflective properties. Page 9 lines 6+ teach the claimed relative amounts of polymer beads to the total weight and the claimed weight volume percentage of the light reflective particles.

Response to Arguments

Applicant's arguments filed 11/29/05 have been fully considered but they are not persuasive.

Application/Control Number: 08/959,125

Art Unit: 1743

Applicants' certified translations are appreciated and have perfected the filing date to 10/31/96.

Applicants' traverse the rejection over EP 162,302 on the basis this reference fails to teach particle having a size range of 1-40 microns embedded with light reflective particles. The Office maintains EP 162,302 teaches light reflective particles within the claimed particle range. Because the particles have indistinguishable sizes and are both light reflective, in the absence of a showing of unexpected results, one having ordinary skill in the art would have expected the identical results of reflection.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lyle A. Alexander whose telephone number is 571-272-1254. The examiner can normally be reached on Monday, Wednesday and Friday.

Art Unit: 1743

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jill Warden can be reached on 571-272-1267. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
